

Wardrobe Caster Base

Southwest Contract has provided a moveable option on wardrobes for many years. A wardrobe caster base assists both students and staff alike, all while providing additional flooring and wall protection. Students gain flexibility to create the best room environment that suits their desired layout. Staff will enjoy an easy, movable option for cleaning and room positioning when summer conferencing is needed. The wardrobe caster base has been redesigned to provide enhanced weight distribution and increased mobility. A slightly larger base panel creates a wall-saver feature by coming in contact with cove base, ultimately protecting the nearby wall.
